CONCRETE REPAIRS

CONCRETE WATERPROOFING SOLUTIONS

Rooftop swimming pool

Concrete is a porous compound which absorbs water, waterborne contaminants and chemicals that causes it to deteriorate. Modern technologies in waterproofing is key to enhancing the sustainability of your infrastructural developments. In this process, we apply a waterproof membrane on concrete which makes the structure water tight so that it remains relatively unaffected by water leakages.

**Flat roof
waterproofing**

**Basement
waterproofing**

Our solutions include:

- Admixtures
- Joint sealants
- Concrete repairs
- Waterproofing membrane
- Water plugs
- Water bars

Constructive Solutions

CONCRETE CORE DRILLING:

The technique of cutting perfect cylindrical holes into concrete floor slabs, walls, beams, columns etc by use of specialized drilling equipment to accommodate new conduits, plumbing piping, reinforcements.

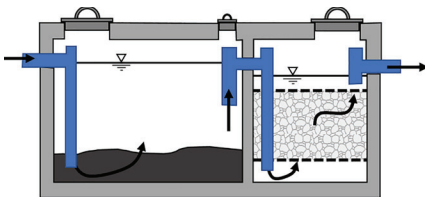

CONCRETE TANKS / POOLS / PONDS

We build, maintain and repair concrete tanks, pools and ponds for underground and surface storage by choosing the correct design, use of high quality materials and expert waterproofing solutions.

WASTE WATER RECYCLING.

Through our partnership with bioliff, we are able to convert your conventional septic tank into a high tech waste water recycling system. We employ a biological process that converts sewage into clean, clear, odourless and pathogen free water that can be used in irrigation, car wash, toilet flushing etc

SAY GOODBYE TO EXHAUSTER SERVICES!

CONCRETE SLABS & FLOORS

Modern buildings require strong well cast concrete slab that can withstand the weight of the structure and provide a good floor or roof.

CONCRETE REPAIRS & SURFACE TREATMENTS

A wide range of polymer and epoxy based high strength, high performance, mortars, suitable for repairs of concrete masonry etc.

GROUTS, ANCHORS & JOINT SEALANTS

We have a wide range of cement and resin based high efficiency products for heavy load bearing units and machinery baseplates along with anchoring systems to install permanent Anchors. Joint sealants are designed for sealing expansion and control joints, pre-cast concrete panel joints, window perimeters, step risers, roof and tilt walls and between construction materials of dissimilar expansion coefficients.

OUR PROJECTS

Bioliff Water Technologies Ltd.

Construction and waterproofing of Concrete waste water tanks
Various sizes

Kamirembe Place - Nairobi Off Ngong Rd

Waterproofing: Wet areas, basements and Flatroof

Woodville Centre - Joska Machakos

Waterproofing Services - Wet areas Flatroof & Basements

Ministry of Energy

Kawi Complex

Basement waterproofing

Naivasha Safari Mall - Naivasha

Repairs and waterproofing 300k litres waste water tank.

Wilma Towers - Nairobi, Off Ngong Rd (Ongoing)

Waterproofing works - Wet areas, basements and swimming pools

Symphony Residence - Riverside Drive, Nairobi (Ongoing)

Waterproofing works - Wet areas basements and swimming pools

1870 West - Westlands Nairobi (Ongoing)

Basement Waterproofing

Other private developments

OTHER SERVICES

- Building & Construction
- Paint Supply & apply
- Epoxy paint and coatings
- Tools & Accessories
- Concrete Core Drilling
- Concrete Pressure Washing
